

# INSTALLATION KIT FOR ICE MAKER OR FOUNTAIN ADAPTER

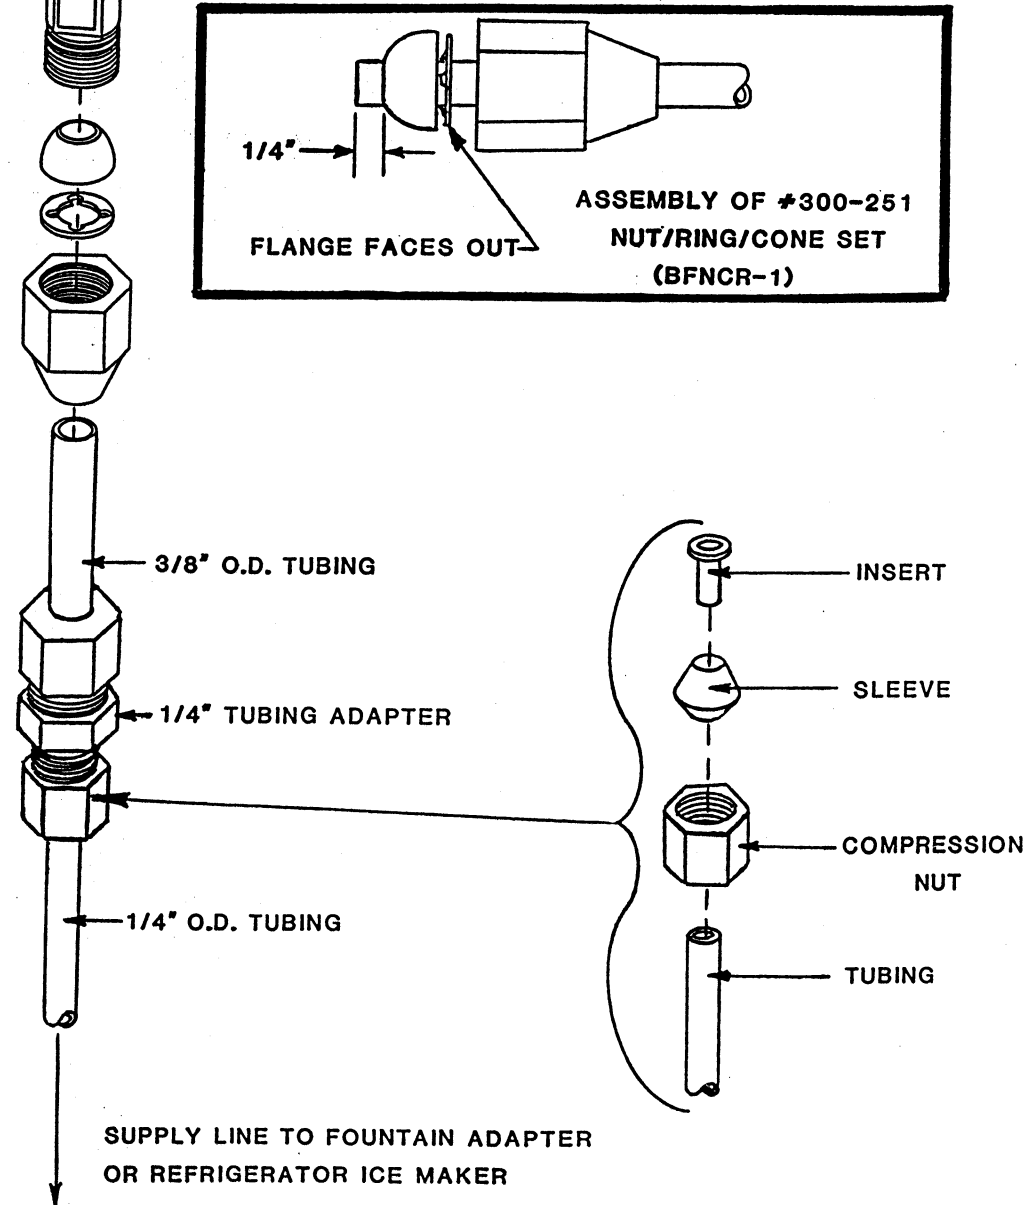

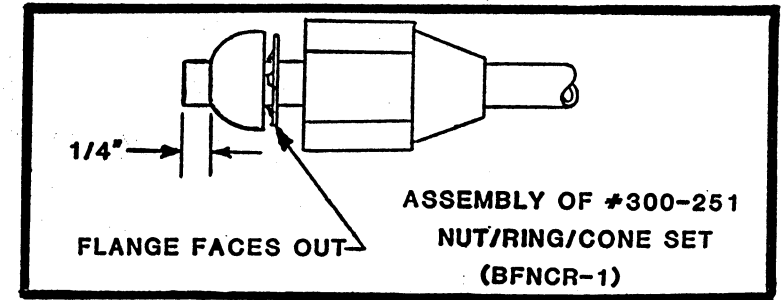

PART #	DESCRIPTION	QTY USED
300251	NUT/RING/CONE SET (BFNCR-1)	3
300275	TEE 1/2 x 1/2 x 1/2 (T333T)	1
300204	DELTRIN SLEEVE BRASS INSERT *	1 !
300205	1/4 C NUT	1
300292	1/4 OD TUBING	16'
300310	FITTING, ADAPTER 1/4 C x 3/8 C NYLON	1

\* Tube insert size may vary according to the inside diameter of the tubing.

1. Find a suitable location to install "TEE" fitting into the distilled water line. Make sure that line is not pressurized. It is best to locate the tee to minimize the length of the run of 1/4" tubing.
2. Cut a 3" section out of the line and attach 2 of the NUT/RING/CONE sets to the line ends as shown.
3. To install the "TEE" attach the 3rd NUT/RING/CONE set to the 3" tubing section that was removed and attach it to the "TEE".
4. Attach the 1/4" tubing adapter to the end of the 3/8" tubing. The 1/4" tubing will supply the Fountain Adapter or Refrigerator Ice Maker.

NOTE: Where desirable (or if there is to be a long distance from the "TEE" location to the Ice Maker) a longer length of 3/8" tubing (not supplied) may be substituted for the 3" length of tubing mentioned.
